TECHNICAL SKILLS

Languages & Frameworks:	Python, Django, Rest API, Angular, React, FastAPI, JavaScript, Ajax, Bootstrap
Databases:	PostgreSQL, MySQL, SQLite3
AI / ML:	LLM Integration, Local Model Deployment, AI Automation
Tools & Platforms:	Docker, Redis, Git, Postman, Linux, Apache
Concepts:	System Design, Secure Architecture, ETL Pipelines, Data Processing, API Integration, RBAC
Other Skills:	Team Management, Technical Documentation, Server Management, Cross-functional collaboration

WORK EXPERIENCE

Solution Engineer | SPR Consultech Chennai, Tamil Nadu, India **Feb 2026 – Present**

- Leading development of enterprise-grade AI and automation platforms, working across full-stack architecture, backend systems, and AI model integration.
- Architected an AI-powered SLD (Single Line Diagram) generation system, integrating local and open-source LLMs into a scalable full-stack application for automated engineering diagram generation.
- Designed and developed a fintech accounting and vendor management system enabling invoice processing, vendor bill tracking, and Zoho Books integration with secure and scalable architecture.
- Built a Python-based financial data processing engine for consolidating and analyzing bank statements from multiple Excel sources, generating structured reconciliation reports.
- Focused on system design, API architecture, performance optimization, and production deployment readiness across multiple applications.

Project Engineer | CDAC (Ministry of Electronics & IT) Chennai, Tamil Nadu, India **July 2022 – Jan 2026**
(Promoted from Project Associate in Jun 2023)

- Led the end-to-end development of secure Django-based web applications using Python, Django REST Framework, Angular, and PostgreSQL.
- Architected secure REST APIs and optimized database schemas, improving application security, performance, and maintainability.
- Developed enterprise applications including a Next-Gen Central Management Server (NG-CMS), Question Bank system, server monitoring dashboard, and DGR recruitment portal.
- Implemented role-based access control (RBAC), secure file sharing, authentication, multilingual support, and production deployment workflows.
- Managed deployments, code reviews, Git repositories, application monitoring, and technical documentation while collaborating with cross-functional teams.

Graduate Apprentice Trainee | NLC India Ltd, Neyveli, Tamil Nadu, India **Mar 2022 - Jul 2022**

- Contributed to the development of a web-based House Allotment and Smart Metering application, collaborating on features like user registration, real-time meter data collection, and efficient house allocation management.

Assistant Professor | Kalaimagal College of Arts and Science, Pandalkudi, Tamil Nadu, India **Aug 2021 - Feb 2022**

- Handled Lab subject and office administrative tasks.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering(BE-CSE) - 7.99 CGPA **Jun 2016 - May 2020**
Dr. G.U. Pope College of Engineering(Anna University Chennai), Thoothukudi, Tamil Nadu, India

School Education - 90.67% **Jun 2014 - May 2016**
Government Higher Secondary School, Pudur, Tamil Nadu, India

CERTIFICATES/ACHIEVEMENTS

- Security Audit Certificate from CDAC-Hyderabad(CERT-In Empanelled Organization)
- Certification in Python, SQL, Angular, ReactJS, and JavaScript.
